

目 录-DIRECTORY-

轨道车辆大挤压型材的生产(1)

Production of large extruded profiles for rail vehicles(1)

骨植入生物可降解镁合金研究进展

Research progress of biodegradable magnesium alloys for orthopedic implant materials

汽车用高强韧含LPSO相镁合金的研究现状及展望

Research status and outlook of the LPSO-phase-containing magnesium alloys for automobiles with high strength and ductility

架空导线用中强铝合金轮带式连铸锭坯的组织

Structure of the moderate-strength aluminum alloy for overhead conductors during the rotary-wheel casting process

铝合金罐盖料黑条缺陷产生的原因及其预防措施

Cause and preventive measures of black-streak defects on end stocks of aluminum alloy

生产工艺对新型3xxx铝合金箔材组织与性能的影响

Effect of production process on microstructure and properties of new 3000 series aluminum alloy foil

大断面空心铝型材挤压模的设计分析

Analysis of the die design for aluminum hollow profiles with large sections

铝合金板材超声波C扫缺陷成像与探伤参数选择

Imaging of the ultrasonic C-scan defect and selection of inspection parameters of the aluminum alloy plate

值酸转换膜对AZ31镁合金电化学腐蚀性能的影响

Impacts of the physic acid conversion film on electrochemical corrosion of AZ31 magnesium alloy

含铝镁基储氢合金的电化学稳定性

Electrochemical stability of hydrogen-storage alloy with aluminum-magnesium matrix

2A12铝合金搅拌摩擦焊接头腐蚀性能的研究

Study on the corrosion behavior of the friction stir weld of 2A12 aluminum alloy

刊号: ISSN 1007-7235, CN 23-1226/TG, 国内邮发代号 14-112, 国外发行代号 4663M
